The Mathews barrel, containing all working parts of the hydrant, is readily removed for inspection of sepair by simply unscrewing it from

#### I want you to see for yourself how the Mathews replaceable barrel is a real community asset

I can show you easily and quickly with this scale model. See? When a Mathews is broken by a skidding automobile, you can slip in a new barrel in a matter of minutes, and without excavating. It's a real safety feature for the community—allows only momentary interruption of neighborhood fire protection.

And these additional quality features help keep the Mathews at the head of the line:

- Compression-type valve opens against water pressure—
  a positively leakproof construction
- Operating thread connet be bent
- Head revolves 360° just by loosening boits
- Nozzle sections are drangeable
  Nozzle levels can be raised or lowered without excavating
  Sell, mechanical-joint or flange-type connections
- O-Ring soal furnished when specified

List of Members	1
Geographic Distribution	205
Summary of Membership	236
AWWA Publications	249
List of Advertisers	32a

This 1958 edition of the AWWA Directory contains the membership list, corrected through Jun. 30, 1958. In accordance with the policy of annual publication, another Directory will be published in 1959, and will contain a list of new members for the intervening year, as well as such editorial material as a water works buyers' guide, procedural and historical information about AWWA, and other features. The next full membership list will appear in the succeeding Directory, in 1960. (The two Directory sections appear in alternate years—the membership lists in the even-numbered years; the other reference matter in the odd years.)

This Directory is not for sale. It is distributed to members of all grades for their use as members of the Association and is not to be placed in the hands of any nonmembers to be used as the basis of personal or mail promotion or solicitation.

Officers of the Association and its Sections or Divisions may obtain addressed labels from the membership list without charge if the application for such list is made in writing by the person requesting it and the use to which the name list is to be put is clearly stated and shown to be in conformance with the conditions laid down in the paragraph above.

Any member of the Association may purchase a set of addressed labels or cards by depositing with the Secretary an amount designated by him to cover labor and material, and by recording the exact use to be made of the list. If the designated use to which the list is to be put is not in accord with the intent of the first paragraph herein, the Secretary will not make the list available to the applicant.

#### INTRODUCTION

THE American Water Works Association was organized in 1881 to "advance the knowledge of the design, construction, operation, and management of water works." Its activities in part are developed through regional or state Sections, in part through general Divisions, in part through technical committees, and in part through its monthly Journal.

There are at present 31 regional or state Sections. The largest ones are in California, the Southwest, and New York. Each Section has at least one meeting each year with attendance totals ranging from 100 to more than 1,400 interested persons. Papers are presented; round table discussions are held; tests are made; products are sometimes exhibited—all calculated to improve water works design and management in the Section area.

There are four professional Divisions of the Association: Management; Water Resources; Water Purification; and Distribution. The programs at the Annual Conferences of the Association are built around the activities of these Divisions.

The technical work of the Association is organized under the Committee on Water Works Practice and the Committee on Water Works Administration. These are groups of men selected to provide a cross section of the Association's field of interest, in the persons of leaders in the field. No technical pronouncements in the name of the Association are made until they are accepted by these committees and approved by the Board of Directors. The Board has also established certain special committees to deal in fields of Association policy. At present such committees include "General Policy" and "National Water Policy."

The Journal AWWA is a monthly publication which totals approximately 3,000 pages per year. In it are found the papers and reports on water works subjects deemed to have permanent or major value to the field. About 100 pages annually are devoted to abstracts of articles the world over which relate to all aspects of water works affairs. No comparable cross section of data exists elsewhere. An Index of Association publications for the years 1881 to 1939 has been issued, as well as an Index to the Journal for 1940–55. In addition, a detailed index to each annual volume of the Journal appears in the December issue.

Another publication distributed to AWWA members is Willing Water, a monthly bulletin devoted to public relations, safety, defense, and other special problems.

The Association maintains headquarters at 2 Park Avenue, New York 16, N.Y., with a full-time staff of eighteen persons available for conference or correspondence on matters of general water works interest.

#### LOCAL SECTIONS

There have been established 31 Local Sections, under the provisions of Article VII of the Association's By-Laws. Each member of AWWA is automatically a member of the Section in whose territory he resides.

Each Local Section has its own officers, as listed each month in the JOURNAL. These officers are all selected by the Section itself under the provisions of the By-Laws of that Section. One of these officers is a member selected to represent his Section on the Board of Directors of the American Water Works Association, in accordance with Articles III and IV of the Association's Constitution.

The Local Sections each hold one or more meetings during the year, their practice in this respect, as well as the conduct of all of their business, being adapted to meet best the needs of their respective territories. Papers presented at the Local Section meetings are drawn upon for publication in the JOURNAL of the Association, as are also the papers presented at the Annual Convention of the Association.

Many of the Association's Sections hold each year one or more water works schools (conferences or in-service training institutes) and several cooperate in the procedure within their states which licenses the operators of water treatment plants. This is done in order to insure to the various communities as permanent and well trained personnel as can be provided.

#### NATIONAL DIVISIONS

In accordance with the provisions of Article VII of the Association's By-Laws, the Board of Directors has established four national Divisions consisting of groups of the members who are particularly interested in certain branches of the water supply industry.

Water Works Management Division. By the organization of the Water Works Management Division in 1948, the previous Plant Management and Operation Division, established in 1924, and the Finance and Accounting Division, established in 1929, were terminated. The new Division combines the functions of both, taking as its specific fields of interest the financing, management, commercial practices, and accounting procedures of water works. Additions to knowledge and the improvement of practices within these fields are the objectives of the Division.

Water Resources Division. The conservation and orderly development of both surface and ground waters, and the control of water pollution as it affects

the economics of water supply, are the field of interest of the Water Resources Division. The Division was organized in 1948.

Water Purification Division. This Division was organized originally as the Chemical and Bacteriological Section in 1913. The present name was adopted in 1925. The objects of this Division in particular are: the advancement of the science and art of water purification; the stimulation of research in the physical, chemical and bacteriological fields, especially on the causes and effects of pollution and methods of purification; and the promotion of progress in the design, construction, and operation of water purification works.

Distribution Division. The scope of the Distribution Division, which was organized in 1952 as the Transmission and Distribution Division, includes design, construction, operation, and maintenance activities in the fields of power, pumping, transmission, distribution, customer services, and metering of public water supply.

Any Active or Junior Member of the American Water Works Association may become a member of any one or more of these Divisions upon request, and with no further dues. The principal activities of the Divisions take place during the Annual Convention of the Association, at which time a number of the technical sessions are held under the auspices of the Divisions. These sessions are presided over by the officers of the Division concerned and the subjects of discussion are those in which the Division is interested. The Divisions may also appoint committees for study, research, and report upon subjects of interest to them. These committees act under the general supervision of the Association's standing committees on Water Works Practice or Water Works Administration, if they have as their object the development of standards or manuals. If the committees are set up for the compilation of related facts and routine practices within the field of interest of the Division, the committees on Water Works Practice and Water Works Administration exercise no supervision.

#### MEMBERSHIP LIST

The list beginning on page 1 includes AWWA members of all grades—Honorary, Life, Active, Corporate, Associate, and Junior—and also the Municipal Service Subscribers. A geographic breakdown of the membership follows the list.

The date when the member joined the Association is cited in each listing. Active and Life Members are designated only by the date; for example: (Jul. '39). Corporate, Associate, and Junior Members are shown in the following manner: (Corp. M. Jul. '39), (Assoc. M. Jul. '39), (Jr. M. Jul. '39). Municipal Service Subscribers are shown by: (Munic. Sv. Sub. Jul. '39).

National offices held by members are cited according to the years of the conventions during which the members served. Thus, for example, a member taking office the last day of the 1948 convention and serving until the last day of the 1949 conference will be listed as "Vice-Pres.' 49." Awards and Honorary Memberships are shown by the year of the convention at which they were presented. Members enrolled in one or more of the Association's four Divisions—Water Works Management Division, Water Resources Division, Water Purification Division, and Water Distribution Division—are designated by M, R, P, and D, respectively.

#### . . with the greatest of ease

It fits in our budget with greatest of ease, With savings at which no smart buyer can sneeze, Low cost plus long life and best service he sees Mean premium pipe at low pay.

It matches our plans with the greatest of ease, Complete with bends, shorts, Y's, adapters and T's, Designed for what pressure or backload we please, The pipe we are proud to OK.

It goes in the ground with the greatest of ease, Is rapidly jointed come storm, heat or freeze, No caulk, bolt or weld—installation's a breeze, And backfilled the very same day.

It carries full pressure with greatest of ease, Corrosion and tubercles never displease, High maintenance costs never put on the squeeze With uncalled for bills to defray.

## LOCK JOINT CONCRETE PRESSURE PIPE

#### CHORUS

It fills all our needs with the greatest of ease, It's thrifty yet safe everybody agrees, No wonder we all say, "No substitutes, please!" for this QUARTET!

Mueller Copper Meter Yokes for any installation!

Call your Mueller Representative or write direct for details on the full line of Mueller meter setting equipment.

"Out of sight—out of mind" can be a mighty expensive philosophy in any water distribution system. The above unretouched photograph proves this point. It shows a badly tuberculated eight inch main whose inside diameter was reduced to an average of almost 4.5 inches. Resultant higher pumping costs with reduced pressure and carrying capacity make it costly to tolerate such conditions. That is why the savings effected in reduced pumping costs frequently pay for the low cost of National water main cleaning.

Since there's never a 'charge or obligation to inspect your mains, call National now!

# How to select the right flow-measuring device

Selecting the correct device is simply a matter of choosing the one that best meets your requirements. The wide variety of Simplex Primary Elements makes this selection easy.

This table shows you which of Simplex's standard elements performs best under various flow conditions. (Not shown are Simplex primary devices of steel or concrete, designed to meet the physical limitations on special jobs.)

SIMPLEX VENTURI TUBES produce a minimum head loss—returning 85% to 90% of the differential head developed for meter operation. Since pressure differentials are measured between the

main and throat sections, the tubes are smooth, true in shape and of accurate diameters to produce a stable coefficient of discharge. This gives you accuracy over wide flow ranges...accuracy within ±0.3% if required.

Write for Technical Bulletins. Simplex Valve & Meter Co., Dept. JA-8, 7 East Orange Street, Lancaster, Pa. A subsidiary of Pfaudler-Permutit, Inc.

#### FLOW CONDITION

NORMAL WATER, AIR OR GAS FLOWS

#### TYPE VT-STANDARD VENTURI TUBES

SOLUTION

Cast iron with bronze bushed main piesometer holes and bronze throat liner. Flanged, bell or spigot ends. Inspection opening at throat. Special metals for high pressures or caustic liquors, corrosive gases, brines, etc.

NORMAL WATER, AIR OR GAS FLOWS

#### TYPE TG-INSERT TUBES AND NOZZLES

Withstand high pressures. Fit inside existing lines . . . permitting light construction. This, plus short length, cuts costs.

BULLETIN 100

SMALL FLOWS
OF WATER, GASES
CORROSIVE FLUIDS

#### TYPE TF-MINIATURE VENTURI TUBES

Machining to .0005" assures accuracy. Main diameters as low as ½"; throat diameters down to .1". Welded stainless steel models for high pressures.

NORMAL SEWAGE, SLUDGE, TRADE WASTES

#### TYPE VIJ-SINGLE TAP VENTURI TUBES

Single taps at main and throat have bayonet-type valve for fast cleaning. Absence of pressure belts prevents clogging. Inspection opening at throat.

NORMAL SEWAGE, SLUDGE, TRADE WASTES

#### TYPE VS-FOUR TAP VENTURI TUBES

Four cleaning valves at main and throat can be operated manually, by air, or hydraulically to keep piezometer holes clear for top accuracy. Two hand holes on each pressure belt and inspection opening at throat.

BULLETIN 005

LOW-VELOCITY SEWAGE, HEAVY WASTES

#### TYPE VE-ELLIPTICAL VENTURI TUBES

Developed specifically to accurately measure low-velocity sewage, sludge and heavy trade wastes-under low pressures. Flat top prevents air binding. Flat bottom is self-scouring. Inspection opening at threat.

BROCHURE

LOW-HEAD SEWAGE, SLUDGE, TRADE WASTES

#### TYPE S-PARABOLIC FLUMES

Full 20:1 range for open flows. Accuracy ±2%. Flanged, bell or spigot inlet for 6 to 36" lines. Integral sediment trap, piezometer reamer, gauge glass, direct-reading flow scale.

#### SMITH THROTTLE CONSTRUCTION VALVES

ELIMINATES

disc tilting and chatter

REDUCES
wear of
disc & seat
ring faces

Smith Square Bottom Throttle Construction Valves have all of the time-proven design and construction refinements of standard Smith Gate and Tapping Valves and are recommended for severe service applications such as throttling in a partly open position, daily or frequent operation against high unbalanced pressure, high velocity or installation in a flat position in vertical piping.

The design features consisting of disc shoes and body tracks mechanically lift and hold the disc ring face (1) out of contact with the seat ring face (2) at all points of disc travel with the exception of the

fully closed position.

Throttle construction valve discs are provided with three non-ferrous metal shoes (3), precision-machined and jig located. Valve bodies are provided with three non-ferrous metal machined tracks (4). The three disc shoes register with the three body tracks and each shoe is in contact with a track while the valve is unseated and in any partially open position. The bottom section of each track is bevelled to insure that the shoes will not bear on the tracks when the valve is fully closed.

This construction prevents damage to and uneven dics and seat face wear and assures long service life under severe operating conditions.

Single throttle construction is used when the flow is not subject to reversal. Double throttle construction when the flow is subject to reversal.

## TAKE THE DOUBT

MODERNIZED COST iron

## **OUT OF PIPE BUYING**

# Specify Modernized Cast Iron Pipe and be <u>SURE!</u>

# 6 reasons why Cast Iron Pipe is f1 choice of U.S.A.

#### 1. EXTERNAL LOAD RESISTANCE...

6" Class 150 Pipe withstands a crushing lead of 17,900 pounds per feet . . . nearly 9 tens.

#### 2. HIGH FLOW CAPACITY ...

Coment lined east iron pipe and fittings will not tuberculate . . . delivers a full flow for the life of the pipe.

#### 3. LONG LIFE ...

42 North American cities are still using cust from water mains laid 100 years and more ago. Hundreds more have passed the 50 year mark.

#### 4. BEAM STRENGTH ...

Cost from Pipo is inherently tough . . . stands up under issury traffic lead, soil displacement and disturbance.

#### S. CORROSION RESISTANCE ...

Cast Iron Pipe offectively resists correction ... vital factor in its long life and depends billy.

#### 6. TIGHT JOINTS ...

A full range of leak-groof, low cost, easy-to-assemble joints for pipe and fittings are available for all conditions.

Before you choose any pipe remember this important fact . . . it will save you many a headache later.

In all the history of water systems no substitute pipe has ever come close to matching cast from pipe'a century old record of dependability, long life and long term economy.

Specify cast iron pipe, and your pipe worries are over, not just beginning. Cast iron's performance is based on PROOF not claims!

THE MAN WHO CHOOSES
CAST IRON PIPE TODAY
WON'T PAY FOR IT AGAIN

HARDNESS TESTER (left) initiates regeneration by Automatic Controls (right). This new Permutit plant, with Q resin, softens 72% more water—using same manpower, less salt! E. Aurora, N. Y. Village Eng.: E. J. Maurer.

# Why these cities chose PERMUTIT® water conditioning

Some chose Permutit for its world-known engineering experience gained through thousands of installations covering every major development in clarification, filtration and softening equipment.

Others chose Permutit to get complete, integrated service: the water-analysis labs, engineering, equipment, controls, ion exchange resins—all from one source, under one responsibility.

But most of the designers of these plants chose Permutit because they have personal knowledge of many installations where Permutit equipment has given long years of efficient, trouble-free performance. They know that's what pays off in the long run.

The Permutit Company, Dept. JAD, 50 West 44th St., New York 36, N. Y. (a division of Pfaudler Permutit Inc.)

# Centriline's conversation piece at the A.W.W.A. convention

Excitement ran high. Crowds thronged around the Centriline booth, eager to see and inspect this revolutionary new development for relining small diameter pipes in place. For years, large mains have been renewed by the famous Centriline Process of centrifugally applying a cementmortar lining which permanently prevents future tuberculation, corrosion and leakage. Now, with the introduction of the new small diameter Centriline machine, every & 's important transmission and distribution lines from 6" to 14" can also enjoy the same money saving protection. The

new Centriline machine has a design feature which eliminates excavations at valves, laterals and corporation cocks. Through Centrilining, the pipes in your system regain their original flow capacity and pressure . . . pumping and maintenance costs are reduced and the line's life is extended indefinitely. Centrilining accomplishes all this with a minimum of interruption to surface traffic. since the pipes are lined in place. Send today for your copy of our illustrated brochure which fully describes how Centriline can help you salvage worn out lines of every size.

## "WEDGE-LOCK" DESIGN

of Rockwell Butterfly Valves means "Drop-Tight" Closure

This Rockwell "exclusive" meets and exceeds the most rigorous. AWWA butterfly valve specifications for tight closure and troublefree service.

In the valve's most vital part—the valve seat—the stainless steel edged disc seats tightly against the crowned, abrasion-resistant surface of the multi-ply rubber seat. The seat insert is secured to the valve body by serrated contact with the retainer segments. The entire seat can be conveniently removed and replaced at site of installation.

Rockwell AWWA Butterfly Valves assure positive control, minimum restriction of flow, minimum pressure drop and lower maintenance. They require less installation space. Valves are made in full range of sizes, with manual control, cylinder or motor operator.

Many leading water service installations are now Rockwell-equipped. The reason is obvious, Bulletin 581 tells why.

W.S.ROCKWELL COMPANY

2608 ELIOT STREET \* FAIRFIELD, CONN.

#### The meter you

buy today ...

## will it meet 1988 standards?

When buying new water meters, a most important question of cost is: "In 30 years will this meter be *scrapped*, or will it be rebuilt to 1988 standards at a fraction of the cost . . . ready for years more accurate service?"

Take a look at the past 30 years. Think how much you're saving this year on Trident meters installed back in 1928... or even 30 years before that.

Under Trident's strict policy of interchangeability, all improved parts are designed to fit old Tridents too. These up-to-date Trident parts embody every thoroughly tested advancement known to metering science. Not only is repairing easy and economical, but also you actually modernize your Tridents as you go.

This has been a rigid Neptune policy for 60 years. Every design improvement now on our drawing boards will continue it. It's your best assurance that the Tridents you buy today will stay modern, earning maximum revenue for your water system . . . at lowest cost . . . for many years to come.

## HAMMOND **PROVIDES**

WATER STORAGE for ALEXANDRIA, LA.

HAMMOND Standpipes, Reservoirs, Elevated Tanks, Spheres, Filtration and Purification Units for Water Supply & Fire Protection Systems are built to all standard codes and specifications including those of the American Water Works Association, Associated Factory Mutual Fire Insurance Companies, the National Board of Fire Underwriters, the Factory Insurance Association.

Catalog H<sub>2</sub>O details and describes all HARRHOMD Water Storage and Processing Vessels . . . Write for your copy.

#### HAMMOND

WARREN, BRISTOL and PITTSBURGH, PA. PROVO, UTAH . CASPER, WYO. . BIRMINGHAM, ALA.

Sales affices throughout the U.S.A. Leanners and sales affices in many fareign countries including Argentina, Belgium, Brazil Canada, Calàmbia, Egypt England, France, Haiti,

# NOW IS NOT THE TIME FOR PIPE DREAMING

You can't afford to speculate with corrosion control!

Today you are tightening up on business operations. Risks are out. For pipeline protection you can't afford to get away from time-tested corrosion control methods. Protective Coating Materials by Plastics and Coal Chemicals Division give you constant protection—superlative continuity, impermeability, bond, body strength, stability, and chemical inertness. Made from highest quality coal-tar pitch—the shield that has proved best!

Proved and improved for three generations, these Pipeline Primers, Enamels, and Auxiliary Protective Pipeline Felts, form a maximum barrier against corrosive elements.

A staff of Field Service experts are at your call to offer you technical assistance that saves you maintenance time and costs.

Always tell your applicator to use Protective Coating Materials produced by Plastics & Coal Chemicals Division. Write for full information.

PLASTICS AND COAL CHEMICALS DIVISION

Formerly part of the Barnest Division 40 Rector Street, New York 6, N. Y

40 Rector Street, New York 6, N. Y

1211 RIDGE AVENUE, PITTSBURGH 33, PA.

Designers and Manufacturers of VALVES FOR AUTOMATION

For installation savings and performance too!

# TRANSITE PRESSURE PIPE with the Ring-Tite Coupling

goes together fast, locks tight . . . automatically!

Water works engineers have found that with Transite® Pressure Pipe and the Ring-Tite® Coupling, installed costs are lower, performance is higher. Contractors can install it faster, and once installed, it maintains its high flow capacity year after year . . . keeps pumping costs low . . . may mean smaller pipe size to start.

Both Transite Pressure Pipe and Ring-Tite Coupling are made of asbestos-cement. Strong and durable, this material cannot rust, is highly resistant to corrosion, will not tuberculate.

With Ring-Tite, installed costs are less—assembly follows the digger closely. The special coupling design permits quick, easy alignment. To assemble, rubber rings are simply popped into grooves. Then lubricated pipe-ends slide in under the rings easily, smoothly, and surely.

Pipe ends stop positively and are positioned accurately—with ends automatically separated within the coupling. This gives the line flexibility to withstand shock and vibration, relieves line stresses, permits conformance to curves.

For further information on Transite Pressure Pipe and the Ring-Tite Coupling, write for TR-160A.

Crows can install Transite Pressure Pipe as fast as the trench is opened. This means less time on job . . . lower installation costs.

Ring-Tite Fittings, too - You can join Transite Pipe directly to fittings, valves and hydrants embodying the Ring-Tite design . . . no special tools needed, no poured joints.

Johns-Manville

22 EAST 40TH ST.

NEW YORK 16, N. Y.

#### AWWA

## Membership Certificate

Designed to fit any standard 8- by 10-inch frame, this new version of the Association membership certificate will make a handsome addition to your office.

The document is tastefully printed on white rag paper, with the member's name hand-lettered.

When ordering your certificate, please be sure to print your name exactly as you wish it to appear, and enclose your check for \$1.00 to cover the cost of lettering and production.

#### WATER STORAGE TANKS

Over 100 years of skilled fabricating experience in steels and alloys and nationwide manufacturing facilities stand behind Graver water storage tanks. Available in all types—elevated tanks, pump suction tanks, standpipes and reservoirs—Graver's water storage tanks are designed, fabricated and erected to the purchaser's requirements in accordance with the specifications of the American Water Works Association, fire insurance associations, and local codes.

SEE BACK OF PAGE FOR DETAILS ABOUT YARIOUS TYPES

#### STANDPIPES AND RESERVOIRS

Water supply storage tanks whose height exceeds the diameter are referred to as standpipes. When the diameter exceeds the height, they are called reservoirs. Standpipes normally provide static head to the water distribution system; reservoirs usually are intended for storage and reserve supplies. For both types of water tanks, there can be no standard sizes offered. Since the size and form depend upon local conditions and individual requirements, standpipes and reservoirs must be designed in accordance with the special needs of the users and the characteristics of the site.

#### ELEVATED WATER TANKS

Graver elevated water tanks are expertly fabricated from carbon steel, stainless steel or aluminum at Graver plants across the country and are erected on the site by experienced Graver crews to the highest welding srandards.

The selection of one of the standard sizes shown in the table offers the advantage of lowest cost and quick deliveries. Should one of the standard sizes not be suitable, special designs by Graver's engineers is a regular service.

Capacity Gallons	Diameter	Head Range	Number of Columns
25,000	18'-0"	13'-9"	<b>Mar.</b> 200
30,000	18'-0"	16'-6"	4
40,000	20'-0"	17'-10"	
50,000	22'-0"	19'-0"	4
60,000	24'-0"	19'-0"	4
75,000	26'-0"	21'-0"	4
100,000	28'-0"	23'-9"	4
125,000	30'-0"	25'-9"	4

2,500,000	122'-0"	30'-0"	16
3,000,000	124'-0"	35'-0"	20

#### PUMP SUCTION TANKS

Graver is an approved fabricator of pump suction tanks under the Factory Mutual Fire Insurance Companies specifications. All standard sizes shown in the table have ¼" bottoms, ¾" self-supporting roofs and shells of thickness such that stress does not exceed 15,000 psi.

Rated Capacity Gallons	Actual Capacity Liquid Depth = Height = 6"	Diameter	Holght
100,000	100,470	27/0	23'1112"

Orders should be sent to the American Water Works Association, Inc., 2 Park Ave., New York 16, N.Y. Payment is required in advance, in US funds, from nonmembers on all orders. Advance payment is required from members on orders totaling less than \$2.00.

#### BOOKS

Index to Journal AWWA (1940-55)— This cloth-bound, 192-p. book, published in 1956, includes subject, author, and geographic indexes to the Journal for the 16 years from 1940 through 1955. Price, for general sales, \$4.50; to members paying in advance, \$3.60.

Index to Proceedings & Journal AWWA (1881-1939).—This cloth-bound, 285-p. index covers the Proceedings for 1881-1913 and the JOURNAL for 1914-1939. Price, for general sales, \$2.00; to members paying in advance, \$1.60.

Manual of Water Works Accounting— Prepared jointly by the AWWA and the Municipal Finance Officers Assn., this 500-page Manual contains twenty chapters covering all utility accounting practices. 1938; 2nd printing, 1951. Price, for general sales, \$4.00; to members paying in advance, \$3.20.

The Quest for Pure Water—By M. N. Baker. A history of water purification from the earliest records to the 20th century. 73 illustrations, 900 references, 527 pp. 1948; 2nd printing, 1949. Price, for general sales, \$5.00; to members paying in advance, \$4.00.

Standard Methods for the Examination of Water, Sewage, and Industrial Wastes—Published jointly by AWWA, American Public Health Assn., and Federation of Sewage & Industrial Wastes Assns. Cloth bound, 522 pp. Tenth edition, 1955. Price, for general sales, \$7.50; to members paying in advance, \$6.50.

Survival and Retirement Experience With Water Works Facilities—Prepared by a joint committee of the AWWA and the Institute of Water Supply Utilities. Includes reports published in installments in JOURNAL, 1945-46, with additional material

and summary tables. Cloth bound, 566 pp. 1947. Price, for general sales, \$3.00; to members paying in advance, \$2.40.

Water Quality and Treatment—Prepared by AWWA. A comprehensive survey of water quality standards and procedures for purification, softening and other conditioning. Completely revised and enlarged second edition. 451 pp. 1950; 2nd printing, 1951. Price, for general sales, \$5.00; to members paying in advance, \$4.00.

#### MANUALS

Water Rates Manual—M1—A report of the Committee on Water Rates, as published in the March 1954 JOURNAL, plus valuable supplementary data. Paper bound, 64 pp. 1954. Price, for general sales, \$1.25; to members paying in advance, \$1.00.

Silent Service Is Not Enough!—M2— AWWA public relations study, as published in December 1954 JOURNAL, plus appendix. Paper bound, 152 pp., 1955. Price, for general sales, \$1.50; to members paying in advance, \$1.20.

Safety Practice for Water Utilities—M3

—A manual prepared by the Committee on
Safety Practices and originally published
serially in the JOURNAL (July-December
1955). Paper bound, 128 pp., 1956. Price,
for general sales, \$1.50; to members paying in advance, \$1.20; to members ordering quantities of 25 or more, \$1.00 per
copy.

Distribution System Records—M4—A manual on distribution system records and office forms, consisting of a committee report and other material published in the February 1940 JOURNAL (formerly designated C900-40). Paper bound, 52 pp., 1956. Price, \$0.75; to members paying in advance, \$0.60.

<sup>\*</sup> Listings are revised periodically.

# PERIODICALS AND PAMPHLETS

Journal American Water Works Association. A monthly magazine of technical papers, discussions, news, and reports. Issued quarterly from 1914 to 1919; bimonthly from 1920 to September 1924; monthly ever since. Annual indexes are contained in the December issue of each year from 1940 on. Cumulative indexes of authors and articles grouped by topics are described on p. 249. Subscriptions to individuals only in conjunction with AWWA membership in US, Canada, and Cuba; to individuals elsewhere, \$10 per year. Single copy price (issues dated 1954 and later), 85¢; 60¢ to AWWA members. For issues dated 1925–1953, 75¢; to members, 50¢.

The Story of Water Supply. A pictorial presentation designed to acquaint the junior high school student with the history, accomplishments, and workings of public

water supplies. Entertaining; instructive. 16 pp., il., 15¢ (quantity prices on request). "Teaching Aids" 5¢ per copy; one free with each 50 copies of The Story.

FI

F

F

What Price Water? A booklet calling attention to the real value of public water supply by comparing 1940 and current prices of water and other consumer goods, as well as water works costs. Fits No. 10 envelope. 12 pp., 10¢ per copy (quantity rates on request).

Willing Water. A monthly bulletin devoted to public relations, safety, defense, and other special problems. Usually 10¢.

Your Water Supply. A conservation guide designed as an envelope stuffer for quantity distribution. Includes "how-to" information on reading meters, detecting leaks, replacing faucet washers, saving water generally. 12 pp., il., no charge for single copies (quantity rates on request).

#### JOURNAL REPRINTS

Order by title and number, not by topic. Copies of Journal articles not available in reprint form can generally be obtained by ordering a copy of the issue in which they were published; for terms, see "Journal AWWA" in preceding "Periodicals and Pamphlets" section. Additional "Reprints Available" are listed in the Journal each month under that heading.

Air Conditioning. No. 263. Model Ordinance. Prepared by AWWA Committee on Water Use in Air Conditioning and Refrigeration. From December 1950 JOURNAL. 8 pp., 20¢.

Air Conditioning. No. R803. Committee Report: Trends in Air-Conditioning Use and Regulation. From January 1958 JOURNAL. 22 pp., 35¢.

Annual Reports. No. 246. Committee Report: Water Department Annual Reports. Includes a guide to the preparation of an annual statistical report. From August 1950 JOURNAL 14 pp., 20¢.

Excavation. No. R612. G. F. Sowers: Trench Excavation and Backfilling. From July 1956 JOURNAL. 9 pp., 25¢.

Extensions. No. R323. Committee Reports: Water Service for Suburban Areas (from July 1953 JOURNAL), and Water

Main Extension Policy (from August 1949). 39 pp., 65¢.

Extensions. No. R394. Panel Discussion: Extension of Public Services to Suburban Areas. From October 1955 Journal. 28 pp., 40¢.

Filtration. No. R611. K. W. Cosens: Design and Operation Data on Large Rapid Sand Filtration Plants in the United States and Canada. From July 1956 JOURNAL. 35 pp., 60¢.

Fire Protection. No. 299. Unofficial Staff Report: Antifreeze Protection for Sprinkler Systems. From February 1952 Jour-NAL. 3 pp., 10#.

Fluoridation. No. R628. The Fluoridation of Public Water Supplies. A statement of recommended policy and procedure approved by the AWWA Board of Directors May 29, 1949, and published in the July 1949 JOURNAL. Formerly designated AWWA B700-49. 5 pp., 20¢.

- Fluoridation. No. R713. Panel Discussion: Experience in Applying Fluorides. From October 1957 JOURNAL 40 pp., 55¢.
- Fluoridation. No. R320. W. W. Land & E. K. Mosenthal, Court Decisions on Municipal Water Fluoridation. From April 1953 JOURNAL. 10 pp., 25¢.
- Fluoridation. No. R369. W. L. Harris: A Decade of Fluoridation. From October 1954 JOURNAL 6 pp., 204.
- Fluoridation. No. R701. Task Group Report: Status of Fluoridation in the United States and Canada, 1955. From January 1957 JOURNAL. 7 pp., 20¢.
- Fluoridation. No. R721. Task Group Report: Status of Fluoridation in the United States and Canada, 1956. From November 1957 JOURNAL. 8 pp., 20¢.
- Fluoridation. No. R702. Task Group Report: Study of Permanent Color Comparators for Fluorides. From April 1957 JOURNAL. 10 pp., 25¢.
- Grounding. No. 270. AWWA Policy Statement: Grounding of Electric Circuits on Water Pipe. Also C. F. Meyerherm: Water Works Industry's Attitude on Grounding and Stray Current Problems. From April 1944 and December 1945 JOURNALS. 4 pp., 10¢.
- Hydraulics. No. R805. Committee Report: Water Hammer Allowances in Pipe Design. From March 1958 JOURNAL. 16 pp., 25¢.
- Law. No. 318. H. Raines: Legal Liability of Utilities for Service. From March 1953 JOURNAL. 8 pp., 20¢.
- Operation. No. 370. Panel Discussion: Fundamentals of Water Works Operation. From October 1954 JOURNAL 15 pp., 25¢.
- Pension Legislation. No. 254. Committee Report: State Pension and Retirement Legislation in 1949. From October 1950 JOURNAL. 8 pp., 15¢.
- Pipe, plastic. No. R614. W. D. Tiedeman & N. A. Milone. Effects of Plastic Pipe on Water Quality [summary of National Sanitation Foundation research report]. From August 1956 JOURNAL 5 pp., 20¢.
- Pipe, plastic. No. R703. Panel Discussion: Plastic Pipe in Water Supply Use. From April 1957 JOURNAL. 11 pp., 25¢.

- Pipe, steel. No. R601. G. E. Burnett & P. W. Lewis: New Developments in Tests of Coatings and Wrappings. From February 1956 JOURNAL. 22 pp., 35¢.
- Pollution. No. 361. Task Group Report: Characteristics and Effects of Synthetic Detergents. From August 1954 JOURNAL. 24 pp., 35¢.
- Radioactivity. No. 307. Task Group Report: Instrumentation and Methods for Testing Radioactive Contamination of Water. From July 1952 JOURNAL. 12 pp., 20¢.
- Regulations. No. R269. California Section Report: Tentative Regulations Governing Water Service. From April 1951 Jour-NAL 14 pp., 25¢.
- Regulations. No. R802. W. C. Welmon: Service Rules and Standards for California Water Utilities [including California Public Utilities Commission Rules Governing Water Service]. From January 1958 JOURNAL 22 pp., 35¢.
- Resources. No. 278. Morris, Wolman, Pirnie and others. A series of reviews of the President's Water Resources Policy Commission Report. From June 1951 JOURNAL. 32 pp., 30¢.
- Resources. No. R393. Panel Discussion: State Water Resources Legislation in 1955. From September 1955 JOURNAL. 13 pp., 25¢.
- Resources. No. R706. Committee Report (with Preamble by Abel Wolman): Basic Principles of a National Water Resources Policy. From July 1957 JOURNAL. 9 pp., 25¢.
- Safety. No. R395. G. R. McCormack: Labor Department Survey of Injury Rates in Water Industry. From November 1955 JOURNAL. 6 pp., 20¢.
- Services. No. 105. Committee Progress Report: A Survey of Service Line Installation Procedures. From November 1952 JOURNAL 3 pp., 15¢.
- Services. No. 175. S. F. Newkirk Jr.: Selection of Customer Service Meters. Also M. C. Smith: Experiences With Standards for Water Services. From January and March 1947 JOURNAL. 13 pp., 20¢.

- Standards. No. 359. Historical edition of "1908 Cast-Iron Pipe Specifications." From July 1954 JOURNAL. 12 pp., 25¢.
- Standards. No. R374. Chlorine Institute: Recommended Specifications for Stationary Chlorine Storage Installations. From November 1954 JOURNAL. 12 pp., 25¢.
- Statistics. A Survey of Operating Data for Water Works in 1955. From May 1957 JOURNAL. No. R704, 144 pp., 75¢. In combination with statistical analysis by Seidel & Baumann plus R. Porges' summary of 1955 USPHS survey of treatment facilities, from December 1957 JOURNAL—No. R722, 194 pp., \$1.25. The Seidel-Baumann and Porges analyses (without the operating data survey tables)—No. R723, 50 pp., 60¢.
- Storage. No. R343. Committee Report: Potable-Water Storage Reservoirs. From October 1953 JOURNAL. 11 pp., 25¢.
- Synthetic detergents. No. R361. Task Group Report: Characteristics and Effects of Synthetic Detergents. From August 1954 JOURNAL. 24 pp., 60¢.

Training. No. 340. Committee Report: Status of Training Courses and Certification in the United States. From September 1953 JOURNAL. 26 pp., 40¢.

# AWWA STANDARDS

Explanation of designation system: AWWA standard designations consist of two elements separated by a dash; e.g., B224-52T. This would designate a standard in the B200 series (dealing with softening) which was approved (or last revised) as Tentative in 1952. If this document were made Standard (with or without revision) in 1957, the designation would become: B224-57. When such a change in status is accompanied by no revisions, or only very minor ones, the new designation is listed, but standards bearing the earlier designation continue to be furnished by AWWA until existing stocks are exhausted.

# A-Source -

- A100-58—AWWA Standard for Deep Wells. Approved as Tentative Apr. 30, 1945, and published in the September 1945 JOURNAL. Made Standard May 10, 1946; latest revision Jan. 26, 1958. 55 pp., 75¢.
- A101-55 (ASA B58.1-1955)—American Standard for Deep Well Vertical Turbine Pumps. Adopted by AWWA and the American Standards Assn. May 11, 1955, and published in the July 1955 JOUR-NAL. 27 pp., 50¢. Revision pending.

#### -B-Treatment -

#### B100-Filtration

B100-53—AWWA Standard for Filtering Material. Revision of 1943 document approved as Tentative Nov. 15, 1948, and published in the March 1949 JOURNAL Made Standard Jan. 16, 1950. Revised Jun. 2, 1953. 16 pp., 25¢.

# B200-Softening

B200-53—AWWA Standard for Sodium Chloride. Approved as Tentative Jul. 6, 1949, and published in the March 1950 JOURNAL. Made Standard May 15, 1953. 10 pp., 25¢.

- B201-53-AWWA Standard for Soda Ash. Approved as Tentative Oct. 15, 1951, and published in the February 1952 JOURNAL Made Standard May 15, 1953. 6 pp., 20¢.
- B202-54-AWWA Standard for Quicklime and Hydrated Lime. Approved as Tentative Sep. 9, 1952, and published in the January 1953 JOURNAL. Made Standard May 27, 1954. 14 pp., 25¢.
- B250-51-AWWA Standard for Cation Exchanger Test Procedures. Revision of 1943 document approved as Tentative Dec. 31, 1948, and published in the May 1949 JOURNAL Made Standard May 4, 1951. 28 pp., 40¢.

#### B300-Disinfection

- B300-55-AWWA Standard for Hypochlorites. Approved as Tentative Jun. 2, 1953, and published in the October 1953 JOURNAL Made Standard Jun. 17, 1955. 6 pp., 20¢.
- B301-57T-Tentative AWWA Standard for Liquid Chlorine. Approved as Tentative Oct. 17, 1957, and published in the February 1958 JOURNAL 6 pp., 20¢.

#### B400—Coagulation

- B400-53-AWWA Standard for Ammonium Sulfate. Approved as Tentative Jul. 15, 1949, and published in the November 1950 JOURNAL Made Standard May 15, 1953. 7 pp., 20¢.
- B401-53-AWWA Standard for Bauxite. Approved as Tentative Apr. 28, 1950, and published in the July 1950 JOURNAL. Made Standard May 15, 1953. 8 pp., 20¢.
- B402-53-AWWA Standard for Ferrous Sulfate. Approved as Tentative May 31, 1949, and published in the October 1950 JOURNAL, Made Standard May 15, 1953. 7 pp., 20¢.
- B403-54-AWWA Standard for Aluminum Sulfate. Approved as Tentative Aug. 21, 1952, and published in the November 1952 JOURNAL. Made Standard May 27, 1954. 10 pp., 25¢. Revision pending.

B404-58-AWWA Standard for Liquid Sodium Silicate. Approved as Tentative Aug. 5, 1955, and published in the October 1955 JOURNAL Made Standard without revision Jan. 26, 1958. [B404-55T current.\*] 7 pp., 20¢.

### B500-Scale and Corrosion Control

- B500-53-AWWA Standard for Trisodium Phosphate. Approved as Tentative Apr. 3, 1950, and published in the June 1950 JOURNAL. Made Standard May 15, 1953. 6 pp., 20¢.
- B501-53-AWWA Standard for Caustic Soda. Approved as Tentative Oct. 15, 1951, and published in the December 1951 JOURNAL. Made Standard May 15, 1953. 6 pp., 20¢.

#### B600-Taste and Odor Control

- B600-53-AWWA Standard for Powdered Activated Carbon. Approved as Tentative Jul. 11, 1949, and published in the February 1951 JOURNAL. Made Standard May 15, 1953. 14 pp., 25¢.
- B601-55-AWWA Standard for Sodium Pyrosulfite. Approved as Tentative Dec. 18, 1953, and published in the January 1954 JOURNAL. Made Standard Jun. 17, 1955. [B601-53T current.\*] 5 pp., 20¢.
- B602-57T-Tentative AWWA Standard for Copper Sulfate. Approved as Tentative Sep. 15, 1957, and published in the January 1958 JOURNAL. 8 pp., 20¢.

#### B700-Prophylaxis

- B701-54-AWWA Standard for Sodium Fluoride. Approved as Tentative Jul. 21, 1950, and published in the September 1950 JOURNAL. Made Standard May 27, 1954. 7 pp., 20¢.
- B702-55-AWWA Standard for Sodium Silicofluoride. Approved as Tentative May 27, 1954 and published in the August 1954 JOURNAL. Made Standard Jun. 17, 1955. 6 pp., 20¢.
- B703-55-AWWA Standard for Fluosilicic Acid. Approved as Tentative Jul. 30, 1954, and published in the November 1954 JOURNAL Made Standard Jun 17, 1955. [B703-54T current.\*] 5 pp., 20¢.

<sup>\*</sup> See explanation of designation system, p. 252.

### - C-Distribution -

### C100-Cast-Iron Pipe, Fittings

- C100-55—AWWA Standard for Cast-Iron Pressure Fittings. The "special castings" portion of the original 1908 standards for cast-iron pipe and castings; still valid for replacing old fittings, but superseded by various American Standards (which follow) for new installations. Third edition approved as Tentative Oct. 25, 1954. Made Standard Jun. 17, 1955. 30 pp., 55¢.
- C101-57 (ASA A21.1-1957)—American Standard Practice Manual for the Computation of Strength and Thickness of Cast Iron Pipe. Adopted by AWWA and the American Standards Assn. December 1939 and published in the December 1939 JOURNAL. Revised 1957. 172 pp., \$1.50.
- C102-53 (ASA A21.2-1953)—American Standard for Cast Iron Pit Cast Pipe for Water or Other Liquids. Adopted by AWWA and the American Standards Assn. December 1939 and published in the December 1939 JOUNNAL. Latest revision Jan. 13, 1953. 23 pp., 45¢.
- C104-53 (ASA A21.4-1953)—American Standard for Cement-Mortar Lining for Cast Iron Pipe and Fittings. Adopted by AWWA and the American Standards Assn. December 1939 and published in the December 1939 JOURNAL. Latest revision, Jan. 13, 1953. 5 pp., 35¢.

### C300-Concrete Pipe

- C300-57—AWWA Standard for Reinforced Concrete Water Pipe—Steel Cylinder Type, Not Prestressed. Approved as Tentative Dec. 11, 1947, and published in the March 1948 JOURNAL. Made Standard Jun. 13, 1952. Latest revision Jul. 19, 1957. 15 pp., 25¢.
- C301-58—AWWA Standard for Reinforced Concrete Water Pipe—Steel Cylinder Type, Prestressed. Second edition approved as Tentative Jun. 17, 1955. Made Standard without revision Jan. 26, 1958. [C301-55T current.\*] 18 pp., 30¢.
- C302-57—AWWA Standard for Reinforced Concrete Water Pipe—Noncylinder Type, Not Prestressed. Approved as Tentative Sep. 4, 1951, and published in the October 1951 JOURNAL. Made Standard May 15, 1953. Latest revision Jul. 19, 1957. 16 pp., 25¢.

### C400-Asbestos-Cement Pipe

C400-53T—Tentative AWWA Standard for Asbestos-Cement Water Pipe. Approved as Tentative May 15, 1953, and published in the July 1953 JOURNAL 8 pp., 20¢.

### C500-Valves and Hydrants

- C500-52T—Tentative AWWA Standard for Gate Valves for Ordinary Water Works Service. Revision of 1938 document approved May 9, 1952, and published in the September 1952 JOURNAL. Latest revision April 1954. 16 pp., 25¢. Revision pending.
- C501-41T—Tentative AWWA Standard for Sluice Gates. Approved as Tentative Jun. 26, 1941, and published in the October 1941 JOURNAL. 11 pp., 25¢.
- C502-54—AWWA Standard for Fire Hydrants for Ordinary Water Works Service. Revision of 1940 document approved Mar. 16, 1953, and published in the May 1953 JOURNAL Made Standard May 27, 1954. 12 pp., 25¢.

- C503-58T—Tentative AWWA Standard for Wet-Barrel Fire Hydrants for Ordinary Water Works Service. Approved as Tentative Jan. 26, 1958, and published in the August 1958 JOURNAL. 10 pp., 25¢. [Note: The uniform color scheme for fire hydrants, formerly designated C503-37 and printed under the same cover as C502, is now incorporated (as "Appendix B") in both C502 and the new C503.]
- C504-58—AWWA Standard for Rubberseated Butterfly Valves. Approved as Tentative May 27, 1954, and published in the September 1954 JOURNAL. Made Standard Jan. 26, 1958 (including revisions approved Sep. 16, 1957). 16 pp., 254.
- C505-58—AWWA Standard for Metalseated Butterfly Valves. Approved as Tentative Nov. 10, 1955, and published in the February 1956 JOURNAL. Made Standard Jan. 26, 1958 (including revisions approved Sep. 16, 1957). 16 pp., 25¢.

### C600-Pipelaying

- C600-54T—Tentative AWWA Standard for Installation of Cast-Iron Water Mains. Revision of 1938 document approved as Tentative Jun. 3, 1949, and published in the December 1949 JOURNAL Revised May 27, 1954. 33 pp., 50¢.
- C601-54—AWWA Standard for Disinfecting Water Mains. Revision of 1947 document approved as Tentative Mar. 6, 1953, and published in the August 1953 JOURNAL. Reprinted together with commentary, "Revised Main Disinfection Procedure," by Marshall P. Crabill. Made Standard May 27, 1954. 12 pp., 25¢.
- C602-55—AWWA Standard for Cement-Mortar Lining of Water Pipelines in Place—Sizes 16 Inches and Over. Approved as Tentative May 27, 1954, and published in the October 1954 JOURNAL Made Standard Jun. 17, 1955. [C602-54T current.\*] 8 pp., 25¢.

### C700-Meters

C700-46—AWWA Standard for Cold Water Meters—Displacement Type. Published as Tentative in the December 1941 JOURNAL and made Standard May 10, 1946. 12 pp., 25¢.

<sup>\*</sup> See explanation of designation system, p. 252.

- C701—47—AWWA Standard for Cold Water Meters—Current Type. Published as Tentative in the April 1946 JOURNAL and made Standard Jul. 25, 1947. 12 pp., 25¢.
- C702-47—AWWA Standard for Cold Water Meters—Compound Type. Published as Tentative in the April 1946 JOURNAL and made Standard Jul. 25, 1947. 11 pp., 25¢.
- C703-49—AWWA Standard for Cold Water Meters—Fire Service Type. Published as Tentative in the February 1947 JOURNAL and made Standard Jan. 18, 1949. 12 pp., 25¢.
- C704-50—AWWA Standard for Cold Water Meters—Current Type—Propeller Driven. Approved as Tentative Jul. 21,

- 1949, and published in the August 1949 JOURNAL Made Standard May 25, 1950. 12 pp., 25¢.
- C705-57T—Tentative AWWA Standard for Testing Cold-Water Meters. Published in the June 1956 issue of Willing Water as a committee report. Approved as Tentative Jan. 28, 1957. 6 pp., 20¢.

#### **C800—Service Lines**

C800-55—AWWA Standard for Threads for Underground Service Line Fittings. Approved as Tentative Jul. 25, 1947, and published in the October 1947 JOURNAL Made Standard Sep. 15, 1948. Revised Jan. 17, 1955. Included under same cover is "Collected Standards for Service Line Materials," a committee report. 15 pp., 256.

### - D-Storage -

- D100-55—AWWA Standard for Steel Tanks, Standpipes, Reservoirs, and Elevated Tanks, for Water Storage. Latest revision Jun. 7, 1955. Combined with AWWA D102, description of which appears below, in a single booklet. 72 pp., 80¢. Revision pending.
- D101-53—AWWA Standard for Inspecting and Repairing Steel Tanks, Standpipes, Reservoirs, and Elevated Tanks, for Water Storage. Revision of 1949 document approved May 9, 1952. Com-

bined with AWWA D102, description of which appears below, in a single booklet. Made Standard May 15, 1953. 32 pp., 50¢.

D102-55T—Tentative AWWA Standard for Painting and Repainting Steel Tanks, Standpipes, Reservoirs, and Elevated Tanks, for Water Storage. Approved by AWWA as Tentative May 9, 1952, and published in the August 1952 JOURNAL. Available only in combination with AWWA D100 or AWWA D101, prices of which are given above. Last revised Aug. 5, 1955.

<sup>\*</sup> See explanation of designation system, p. 252.

J. Pauli, Chief Engineer and W. Johnson, Chief Chemist of the St. Joseph, (Mo.) Water Company, discuss operation of their W&T V-notch chlorinators. The St. Joseph Water Co. is part of the American Water Works Service Co., Inc. system.

### W & T V-notch Chlorinators — doubly accepted

The St. Joseph Water Co. found breakpoint chlorination the best way to treat Missouri River water. But this increased the range of chlorine requirements in the water treatment. W&T V-notch chlorinators were the answer.

W&T V-notch chlorinators have a chlorine feed range of 20 to 1 with an accuracy of 4%. Based on this acceptance at its St. Joseph plant, the American Water Works Service Co., Inc. has purchased V-notch equipment for use in other plants.

V-notch chlorinators are available to feed from 2½ to 8000 pounds of chlorine per 24 hrs. V-notch equipment also provides permanence and attractiveness through modern reinforced plastics. For comprehensive information about W&T V-notch chlorinators, write for Bulletin S-122.05-A.

### WHY THERE IS A NEED FOR THE ROCKWELL Single Register COMPOUND METER

IN 2-INCH SIZE

### WHEN TO USE A 2-INCH COMPOUND

When full range accuracy and maximum revenue are desired. To meet A.W.W.A. specifications, a Rockwell 2-inch compound must measure at least 95% of all water at flows of only ½ gpm. Displacement meters need only measure 95% at 2 gpm—at rates below that accuracy falls off fast.

When continuous flow rates are in excess of 32 gpm. The propeller unit in a 2-inch Rockwell compound meter is safely rated at 54 gpm for continuous operation. Displacement type meters are rated at only 32 gpm. Thus the continuous flow rating for the compound is 60% greater than the positive meter.

When lower maintenance costs, fewer service interruptions are wanted. At high speeds the measuring chamber of a positive displacement meter will wear more rapidly than the propeller chamber of a compound. And since both meter units in the Rockwell compound always operate within normal capacity limits there can be no overspeeding to cause breakdowns and expensive service interruptions.

So we say if it's a job for a compound, use a compound—use the best, the Rockwell Single Register Compound meter, and save. Rockwell Manufacturing Company, Pittaburgh 8, Pennsylvania.

### Rate Yourself as a

### METERologist...

#### CHECK HERE

- Do you believe in setting water meters so that they are most available for quick and easy reading?
- Do you provide installations which put meters in the proper position and protect them from dirt and damage?
- Are your meters connected into the line so that changing can be quick and trouble-free?
- Do you test meters periodically and maintain them for maximum accuracy?

If you have checked all four you probably use Ford equipment. Den't be discouraged if your grade is off a little; the easy first step toward improving it is to send for a FORD CATALOG. IT'S FREE.

### These Ford Products Make it Easy for you to be a METERologist

#### VOVE 807

For shallow services the Yokebox provides protection to keep meter clean, easy to read and easy to change.

#### COPPERSETTER

A complete meter mounting that brings the meter up for easy reading and changing. Holds service line permanently connected.

### COPPERHORN

Ideal satting for most basements with vertical service lines. Often saves more than its cost in pipe fittings.

### DOUBLE LID

Provides meximum frost protection in cold climates. The Yoke holds risers permanently bracad and connected for easy mater changing.

# The Superior COAGULANT With The Plus FACTORS—

Ferri-Floc gives smoother, more efficient and trouble free operation. Whatever your particular water treatment problem may be, you can depend on Ferri-Floc doing a superior job and doing it efficiently and economically—Ferri-Floc is a free flowing granular salt which can be fed with few modifications through any standard dry feed equipment. It is only mildly hygroscopic, thereby permitting easy handling as well as storage in closed hoppers over long periods of time.

#### WATER TREATMENT

Efficient coagulation of surface or well water. Effective in lime soda-ash softening. Adaptable to treatment of all industrial applications.

#### SEWAGE TREATMENT

Ferri-Floc coagulates wastes over wide pH ranges — It provides efficient operation regardless of rapid variations of raw sewage — Is effective for conditioning sludge prior to vacuum filtration or drying on sand beds.

what price water?

WHAT PRICE WATER? is a 12-page, 4x8-in. booklet that calls to the attention of the reader the real value of public water supply. Comparing 1940 prices of a number of other common items with today's, it also presents a comparison of the 1940 costs of water works facilities with present ones as an indication that water rates must be boosted. Designed to fit in a standard No. 10 business envelope, the booklet sells at prices ranging from 104 to 244 per copy. Imprints of your name and address as well as your rate per thousand gallons or cubic feet can be provided on lots of 500 or more. Ask for sample

### Willing Water Jewelry

Since their introduction in 1964, the Willing Water jewelry items have been most popular as awards, gifts, and good will builders. Presenting a blue-faced Willie in full stride, the emblem has made a hit as a lapel button as well as a decoration on a number of jewelry items. Included in the list of items now available are:

AW-1	Lapel Emblem (screw-back)	.75	AW-8 Shortie Tie Clip (rhodium plated alligator elip)\$1.85
AW-2	Lapel Pin (joint pin & safety catch)	.73	AW-9 Money Clip (rhedium plated)
AW-3	Key Chain (spiral mesh chain and spring-lock holder)		AW-10 Cuff Links (rhodium plated disks) 4.50
	Since Clausette Links Charle Aut. Amer.		AW-11 Earrings (serew type) 2.58

### Willing Water Service Buttons

The popularity of Willing Water lapel emblems has led to the design of a special button for recognition of tenure. The design shown at the left was prepared on the request of the Alliance, Ohio, Water Department, which now uses the service buttons. It is now available to you, with your company name engraved on it. Minimum order is 25 buttons or pins. On such an order a die charge of \$17.50 is made for inserting your company name. The pins (with joint pin and safety catch) or buttons (with serve-bask) are priced as follows:

Bronse	\$1.00	tok	Gold	
Sterling	1.50		Gold	
Cold filled	2.00	2.444	And were the second second second	0.10

The minimum quantity (25) may be assorted as to years of service and as to metal used. Please specify clearly the samber of each type required with pins (for female employees) and with screw backs.

### Water Treatment Equipment

Better Settling. Use of the Rex Verti-Flo Clarifier makes possible improved settling...increases capacities...effects important cost savings.

Better Flocculation. The Rex Floctrol makes possible the production of an optimum floc with the minimum amount of chemicals ...savings in both power and chemical costs.

Better Mixing. Rex Flash
Mixers provide an efficient means
of effecting an almost instantaneous dispersion of chemicals
throughout the water for better
action in the flocculation tanks.

Better Sludge Removal. Rex pioneering in conveyor sludge collector design has led the way to positive, efficient high-capacity removal of sludge from settling tanks...far lower operating and maintenance costs.

### Designed for quality...built for performance...

Continuous research and product improvement have long been the guiding principles of CHAIN Belt Company. The important developments illustrated here are but a few of the contributions CHAIN Belt has made toward greater efficiency and economy in the operation of water treatment plants.

A Rex District Sales Engineer will be happy to provide the complete details...or write CHAIN Belt Company, 4609 West Greenfield Avenue, Milwaukee 1, Wis.

CHAIN BELT

### Here's why Armco Steel Pipe gives you economical, trouble-free water lines

HIGH FLOW CAPACITY smooth, glossy lining prevents tuberculation, keeps flow high.

HIGH STRENGTH

withstands water hammer, external loads, unstable foundations.

DURABLE

available records show scores of 50-year-old steel pipe lines. Recent advances in fabrication of steel and perfection of coatings make 100 years-plus a conservative estimate.

LOW FIRST COST

more than 100 different diameter-wall thickness combinations let you meet requirements exactly—without paying for more metal than you need.

STANDARD OR SPECIAL FITTINGS standard or special fittings, fabricated to your plans, attached to straight lengths of pipe.

COMPLETE QUALITY CONTROL

Armco controls the quality of welded steel pipe from iron ore to finished pipe. Also, each length of Armco Pipe must pass a rigid hydrostatic test before it leaves the mill.

### Standard Specifications for Armco Welded Steel Pipe

Sizes 6" to 26" inclusive: AWWA Standard C-202
Sizes 30" to 36" inclusive: AWWA Standard C-201 using ASTM A-283 Grade
R Stanl

Sizes 6" to 36" inclusive: ASTM A-139; Underwriters' Lab., Inc., Std. Sp. I-888

### **Coating specifications**

Coal tar enamel inside and/or outside per AWWA Standard C-203 Dip galvanized per ASTM A-123 Synthetic red oxide primer Other primers and paints on request

58,000 reasons why Dubuque, Iowa depends on

### Bailey!

Protecting the health of 58,000 Iowans requires the filtering of up to 18,000,000 gallons of water per day. These ten Bailey Filter Operating Consoles control and record the rapid sand filtering process.

Engineers: Consoer, Townsend & Associates Contractor: E. W. Bacharach, Inc.

In the race to supply the ever-increasing demands of industrial expansion and population growth, more and more cities are turning to newer, more economical and more scientific methods of water handling.

In many of these new or modernized treatment plants you'll find Bailey Instrument and Control Systems. Because Bailey can furnish complete control systems made up of standardized components... that not only do a better

job, but can easily and economically be expanded to meet future needs.

Engineers, water superintendents and city officials themselves will tell you that Bailey electric and pneumatic telemetering and control systems are outstandingly reliable and economical, attractive and easy to maintain.

Consult a qualified Bailey Engineer about your water handling requirements. w.2.5

### WATER - AMERICA'S MOST VALUABLE RESOURCE

Water has become a Number 1 problem in the United States. Americans are using water at a greater consumption rate than any other people in history. With population increasing faster than any other nation, it is estimated that by 1975 there will be 227 million Americans—requiring 50% more water than they do today.

Of all our natural resources, water is the one most essential to human existence. Yet water has been one of the least emphasized for research and development. That task now is sponsored by 23 national associations, two of which are American Water Works Association and the Water & Sewage Works Manufacturers Association, Inc., through an agency called The Water Resources Council. It deserves your whole hearted support.
